

Time Shift (Actions)

The information is relevant for version [2.9.34](#) and later.

Description of [Time Shift](#) Actions.

Set video stream

Switching the signal source or file source to the module input.

Parameters

- **Param1** - input stream type.
 - FILE - file source.
 - LIVE - signal from the software module.
- **Param2** - file name, software module name.

Set format conversion

Sets the video conversion mode upon a mismatch of the input signal Aspect Ratio and the module settings.

Parameters

- **Param1** - conversion mode. Possible values: scale, crop, box, letter.
- **Param2** - AFD use flag. Possible values: true or false.

Set Source

Assigns a signal source for the service, with an option to select a different module's output.

Parameters

- **Param1** - string with a new signal source. The string is specified in the format: shm_pal://SERVICE. For example: shm_pal://Capture_1
