

RSS Feeder (REST API)

[Module description](#) **REST API**

Viewing All Generated RSS Streams

```
http://localhost:7901/rss
```

The request outputs the list of RSS channels generated by RSS Feeder services.

Viewing the Selected RSS Stream

```
GET http://<IP_ADDR>:7901/rss/<NAME>
```

The request outputs the stream's XML data. The address is used in graphic compositions as a data source.

Adding Data

```
PUT http://<IP_ADDR>:7901/rss/<NAME>/<FNAME>
```

Deleting Data

```
DELETE http://<IP_ADDR>:7901/rss/<NAME>?guid=<GUID>
```
