

Neovid REST API

The basic Neovid module provides a REST interface to control other Skylark modules.

Neovid supports **Persistent Connection** to perform multiple requests over a single connection.

Select the module from the list to view REST API functions:

- [Action Router \(REST API\)](#)
- [GPI Board \(REST API\)](#)
- [Playout \(REST API\)](#)
- [Program \(REST API\)](#)
- [RSS Feeder \(REST API\)](#)
- [Storage \(REST API\)](#)
